FOR IMMEDIATE RELEASE

Data Centers Delivered to Sponsor and Exhibit at 7x24 Exchange

Award-winning data center design company provides value and enables mission critical enterprise information infrastructures

NEW YORK (June 5, 2012) – [Data Centers Delivered](#), a provider of custom-built, manufactured, modular data center solutions, is participating as a silver-level sponsor and will be exhibiting at table #32 at the 2012 7x24 Exchange scheduled June 10-13 at the Hilton Orlando Bonnet Creek in Orlando.

When asked about this conference Stephen Madaffari, principal, Data Centers Delivered said, “7x24 Exchange is an important industry conference that connects decision makers who design, build, operate and maintain mission critical enterprise information infrastructures with the knowledge they need and resources providers, like Data Centers Delivered. We are excited about sponsoring and participating in this conference and learning how we can help businesses and universities improve their design, installation and power usage effectiveness (PUE) for their mission critical facilities.”

Powered by Epsilon Industries, Data Centers Delivered offers customers the best of both worlds — the customization, larger size, flexibility and aesthetics of a field-built data center facility with the speed, and cost-containment of a containerized data center. The company was recently recognized, along with their project partner, Critical Facilities Technologies, with an honorable mention award by the [Green Enterprise IT awards competition](#) for the design and installation of modular data center for the [University of Colorado-Boulder and US National Center for Atmospheric Research Supercomputer](#).

White space designed by Data Centers Delivered is built to meet any customer's IT requirements by providing proper-size facilities for easy server access and maintenance, are cooled via systems that take advantage of today's waterside and airside economization strategies, and are powered by redundant electrical and control systems. Also, to help customers achieve their target PUE, Data Centers Delivered analyzes the availability and feasibility of multiple alternatives to determine the best option for data center cooling and efficiency needs.
